

# CPSC 304 Project Cover Page

Milestone #: 1

Date: 09/29/2024

Group Number: 36

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Enoch Hsu	56998222	t7j4b	ehsu03@students.cs.ubc.ca
Ryan Tsz Tsun Chan	98578685	q0u8p	ryanttchan123@gmail.com
Bogdan Popereko	31414576	u8l5j	pk762@students.cs.ubc.ca

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

### **Project Description**

The domain of the database is an anime management system, involving information about anime and its viewers. Our database intends to organize the information about anime so users of the database can easily find any details of interest. Additionally, the database will also store reviews created by users about specific anime.

### **Database Specifications**

People using the database will be able to search up the title of an anime to find information about it, or use information that they know about an anime (genre, studio, etc.) to find its name. They can also discover what other anime a studio worked on or what other characters a voice actor voiced. People will also be able to read the reviews left by users, and find recommendations for themselves based on which anime another user rated positively.

### **Application Platform**

We plan on using the provided Oracle server. We will make the project in Java and use JDBC to connect to the database. We also plan on using ORM to more easily work with the database, and we will use JUnit for testing.
